

Safe Solutions for machine buildings

At Rexel we can increase your competitiveness by helping to evaluate your investment potential more efficiently to secure your economic capacity.

Safe

We can support you with a complete functional package to create a safe environment for users, as well as legal certainty for you as a machine and plant manufacturer. Safe machine communication is important to you. We offer security solutions to protect against interference by unauthorised third parties. Our coded and pluggable installation systems will make your energy and signal distribution fail safe and secure.

Flexible

Our system solutions are flexible and can be adapted to your requirements with a modular design. This enables you to react quickly to changes required from your clients. With modification of existing components and new customised solutions, you have the flexibility to adapt to your production processes with tailored logistics concepts.

Fast

It is important to assemble efficiently and avoid troubleshooting. Our solutions are fast to install and error-free. We can save you time through every phase of a project, speeding up your planning process, installation, and subsequent maintenance. Our teams can quickly generate solutions for rapid installation in your machine or plant.

Safety Training

We can support you and your business with the training you need to keep your organisation operating safely and with and compliance.

CESE Course
